CHAPTER 60 1 VIRGINIA STORMWATER MANAGEMENT PROGRAM 2 (VSMP) PERMIT REGULATIONS 3 4 5 Part I 6 7 4VAC50-60-10. Definitions. 8 9 The following words and terms used in this chapter have the following meanings unless the 10 context clearly indicates otherwise. "Act" means the Virginia Stormwater Management Act, Article 1.1 (§ 10.1-603.1 et seq.) 11 12 of Chapter 6 of Title 10.1 of the Code of Virginia. "Adequate channel" means a channel watercourse or wetland that will convey the 13 14 designated frequency storm event without overtopping the channel bank nor its banks or causing 15 erosive damage to the channel bed, or banks or overbank sections of the same. 16 "Administrator" means the Administrator of the United States Environmental Protection 17 Agency or an authorized representative. 18 "Applicable standards and limitations" means all state, interstate, and federal standards 19 and limitations to which a discharge or a related activity is subject under the Clean Water Act 20 (CWA) (33 USC §1251 et seq.) and the Act, including effluent limitations, water quality 21 standards, standards of performance, toxic effluent standards or prohibitions, best management 22 practices, and standards for sewage sludge use or disposal under §§301, 302, 303, 304, 306, 307, 23 308, 403 and 405 of CWA. 24 "Approval authority" means the Virginia Soil and Water Conservation Board or their 25 designee. "Approved program" or "approved state" means a state or interstate program that has 26 27 been approved or authorized by EPA under 40 CFR Part 123 (2000). 28 "Aquatic bench" means a 10- to 15-foot wide bench around the inside perimeter of a 29 permanent pool that ranges in depth from zero to 12 inches. Vegetated with emergent plants, the 30 bench augments pollutant removal, provides habitats, conceals trash and water level fluctuations, 31 and enhances safety. 32 "Average land cover condition" means a measure of the average amount of impervious surfaces within a watershed, assumed to be 16%. Note that a locality may opt to calculate actual 33 34 watershed-specific values for the average land cover condition based upon 4VAC50-60-110. 35 "Average monthly discharge limitation" means the highest allowable average of daily 36 discharges over a calendar month, calculated as the sum of all daily discharges measured during 37 a calendar month divided by the number of daily discharges measured during that month.

38 "Average weekly discharge limitation" means the highest allowable average of daily 39 40

41 42

43

44

discharges over a calendar week, calculated as the sum of all daily discharges measured during a calendar week divided by the number of daily discharges measured during that week.

"Best management practice (BMP)" or "BMP" means schedules of activities, prohibitions of practices, including both a structural or nonstructural practice, maintenance procedures, and other management practices to prevent or reduce the pollution of surface waters and groundwater systems from the impacts of land-disturbing activities. BMPs also include treatment

September 4, 2008

requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage.

"Bioretention basin" means a water quality BMP engineered to filter the water quality volume through an engineered planting bed, consisting of a vegetated surface layer (vegetation, mulch, ground cover), planting soil, and sand bed, and into the in-situ material.

"Bioretention filter" means a bioretention basin with the addition of a sand filter collector pipe system beneath the planting bed.

"Board" means the Virginia Soil and Water Conservation Board.

"Bypass" means the intentional diversion of waste streams from any portion of a treatment facility.

"Channel" means a natural <u>stream</u> or manmade <u>waterway watercourse with defined bed</u> <u>and banks that conducts continuously or periodically flowing water.</u>

"Constructed wetlands" means areas intentionally designed and created to emulate the water quality improvement function of wetlands for the primary purpose of removing pollutants from stormwater.

"Comprehensive stormwater management plan" means a plan, which may be integrated with other land use plans or regulations, that specifies how the water quality and quantity components of stormwater are to be managed on the basis of an entire watershed or a portion thereof. The plan may also provide for the remediation of erosion, flooding, and water quality and quantity problems caused by prior development.

"Construction activity" means any clearing, grading, or excavation associated with large construction activity or associated with small construction activity.

"Contiguous zone" means the entire zone established by the United States under Article 24 of the Convention on the Territorial Sea and the Contiguous Zone (37 FR 11906).

"Continuous discharge" means a discharge which occurs without interruption throughout the operating hours of the facility, except for infrequent shutdowns for maintenance, process changes, or other similar activities.

"Control measure" means any best management practice <u>BMP</u> or other method used to prevent or reduce the discharge of pollutants to <u>surface</u> state waters.

"Co-operator" means an operator to of a VSMP permit that is only responsible for permit conditions relating to the discharge for which it is the operator.

<u>"Clean Water Act" or "CWA"</u> means the federal Clean Water Act (33 USC §1251 et seq.), formerly referred to as the Federal Water Pollution Control Act or Federal Water Pollution Control Act Amendments of 1972, Public Law 92-500, as amended by Public Law 95-217, Public Law 95-576, Public Law 96-483, and Public Law 97-117, or any subsequent revisions thereto.

"CWA and regulations" means the <u>federal</u> Clean Water Act (CWA) and applicable regulations <u>promulgated thereunder that are published in the Code of Federal Regulations (CFR)</u> <u>promulgated thereunder</u>. For the purposes of this chapter, it includes state program requirements.

"Daily discharge" means the discharge of a pollutant measured during a calendar day or any 24-hour period that reasonably represents the calendar day for purposes of sampling. For pollutants with limitations expressed in units of mass, the daily discharge is calculated as the total mass of the pollutant discharged over the day. For pollutants with limitations expressed in other units of measurement, the daily discharge is calculated as the average measurement of the pollutant over the day.

September 4, 2008

"Department" means the Department of Conservation and Recreation.

"Development" means a tract of land developed or to be developed as a unit under single ownership or unified control which is to be used for any business or industrial purpose or is to contain three or more residential dwelling units land disturbance and the resulting landform associated with the construction of residential, commercial, industrial, institutional, recreation, transportation or utility facilities or structures.

"Direct discharge" means the discharge of a pollutant.

"Director" means the Director of the Department of Conservation and Recreation or his designee.

"Discharge," when used without qualification, means the discharge of a pollutant.

"Discharge of a pollutant" means:

- 1. Any addition of any pollutant or combination of pollutants to surface waters from any point source; or
- 2. Any addition of any pollutant or combination of pollutants to the waters of the contiguous zone or the ocean from any point source other than a vessel or other floating craft which is being used as a means of transportation.
- This definition includes additions of pollutants into surface waters from: surface runoff that is collected or channeled by man; discharges through pipes, sewers, or other conveyances owned by a state, municipality, or other person that do not lead to a treatment works; and discharges through pipes, sewers, or other conveyances, leading into privately owned treatment works. This term does not include an addition of pollutants by any indirect discharger.

"Discharge Monitoring Report" or "DMR" means the form supplied by the department, or an equivalent form developed by the operator and approved by the board, for the reporting of self-monitoring results by operators.

"Draft permit" means a document indicating the board's tentative decision to issue or deny, modify, revoke and reissue, terminate, or reissue a permit. A notice of intent to terminate a permit, and a notice of intent to deny a permit are types of draft permits. A denial of a request for modification, revocation and reissuance, or termination is not a draft permit. A proposed permit is not a draft permit.

"Drainage area" means a land and water area on a land disturbing site from which runoff flows to a common outlet point.

"Effluent limitation" means any restriction imposed by the board on quantities, discharge rates, and concentrations of pollutants which are discharged from point sources into surface waters, the waters of the contiguous zone, or the ocean.

"Effluent limitations guidelines" means a regulation published by the administrator under §304(b) of the CWA to adopt or revise effluent limitations.

"Environmental Protection Agency (EPA)" or "EPA" means the United States Environmental Protection Agency.

"Event mean concentration" or "EMC" means the total mass load of a pollutant parameter divided by the total runoff water volume discharged during an individual storm event.

"Existing permit" means for the purposes of this chapter a permit issued by the permitissuing authority and currently held by a permit applicant.

"Existing source" means any source that is not a new source or a new discharger.

"Facilities or equipment" means buildings, structures, process or production equipment or machinery that form a permanent part of a new source and that will be used in its operation, if these facilities or equipment are of such value as to represent a substantial commitment to

September 4, 2008

construct. It excludes facilities or equipment used in connection with feasibility, engineering, and design studies regarding the new source or water pollution treatment for the new source.

"Facility or activity" means any VSMP point source or treatment works treating domestic sewage or any other facility or activity (including land or appurtenances thereto) that is subject to regulation under the VSMP-program.

"Flood fringe" is the portion of the floodplain outside of the floodway, usually associated with standing rather than flowing water, which is covered by floodwater during the 100-year discharge.

"Flooding" means a volume of water that is too great to be confined within the banks or walls of the stream, water body, or conveyance system and that overflows onto adjacent lands, thereby causing or threatening damage.

<u>"Floodplain" means any land area susceptible to being inundated by water from any</u> source. It includes the floodway and flood-fringe areas.

"Floodway" means the channel of a river or other watercourse and the adjacent land areas, usually associated with flowing water, that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot or as otherwise designated by the Federal Emergency Management Agency.

"General permit" means a VSMP permit authorizing a category of discharges under the CWA and the Act within a geographical area.

"Grassed swale" means an earthen conveyance system which is broad and shallow with erosion resistant grasses and check dams, engineered to remove pollutants from stormwater runoff by filtration through grass and infiltration into the soil.

"Hazardous substance" means any substance designated under the Code of Virginia and 40 CFR Part 116 (2000) pursuant to §311 of the CWA.

"Hydrologic Unit Code" or "HUC" means a watershed unit established in the most recent version of Virginia's 6th Order National Watershed Boundary Dataset.

"Illicit discharge" means any discharge to a municipal separate storm sewer that is not composed entirely of stormwater, except discharges pursuant to a VPDES or VSMP permit (other than the VSMP permit for discharges from the municipal separate storm sewer), discharges resulting from fire fighting activities, and discharges identified by and in compliance with 4VAC50-60-1220 C 2.

"Impervious cover" means a surface composed of any material that significantly impedes or prevents natural infiltration of water into soil. Impervious surfaces include, but are not limited to, roofs, buildings, streets, parking areas, and any <u>conventional</u> concrete, asphalt, or <u>compacted</u> gravel surface that is or may become compacted.

"Incorporated place" means a city, town, township, or village that is incorporated under the Code of Virginia.

"Indian country" means (i) all land within the limits of any Indian reservation under the jurisdiction of the United States government, notwithstanding the issuance of any patent, and including rights-of-way running through the reservation; (ii) all dependent Indian communities with the borders of the United States whether within the originally or subsequently acquired territory thereof, and whether within or without the limits of a state; and (iii) all Indian allotments, the Indian titles to which have not been extinguished, including rights-of-way running through the same.

"Indirect discharger" means a nondomestic discharger introducing "pollutants" to a "publicly owned treatment works (POTW)".

September 4, 2008

"Infiltration facility" means a stormwater management facility that temporarily impounds runoff and discharges it via infiltration through the surrounding soil. While an infiltration facility may also be equipped with an outlet structure to discharge impounded runoff, such discharge is normally reserved for overflow and other emergency conditions. Since an infiltration facility impounds runoff only temporarily, it is normally dry during nonrainfall periods. Infiltration basin, infiltration trench, infiltration dry well, and porous pavement shall be considered infiltration facilities.

"Inspection" means an on-site review of the project's compliance with the permit, the local stormwater management program, and any applicable design criteria, or an on-site review to obtain information or conduct surveys or investigations necessary in the enforcement of the Act and this chapter.

"Interstate agency" means an agency of two or more states established by or under an agreement or compact approved by Congress, or any other agency of two or more states having substantial powers or duties pertaining to the control of pollution as determined and approved by the administrator under the CWA and regulations.

"Karst features" means sinkholes, sinking and losing streams, caves, large flow springs, and other such landscape features found in karst areas.

"Land disturbance" or "land-disturbing activity" means a manmade change to the land surface that potentially changes its runoff characteristics including any clearing, grading, or excavation associated with a construction activity regulated pursuant to the federal Clean Water Act CWA, the Act, and this chapter.

"Large construction activity" means construction activity including clearing, grading and excavation, except operations that result in the disturbance of less than five acres of total land area. Large construction activity also includes the disturbance of less than five acres of total land area that is a part of a larger common plan of development or sale if the larger common plan will ultimately disturb five acres or more.

"Large municipal separate storm sewer system" means all municipal separate storm sewers that are either:

- 1. Located in an incorporated place with a population of 250,000 or more as determined by the 1990 decennial census by the Bureau of Census (40 CFR Part 122 Appendix F (2000));
- 2. Located in the counties listed in 40 CFR Part 122 Appendix H (2000), except municipal
- separate storm sewers that are located in the incorporated places, townships or towns within such counties:
- 3. Owned or operated by a municipality other than those described in subdivision 1 or 2 of this
- definition and that are designated by the board as part of the large or medium municipal separate
- storm sewer system due to the interrelationship between the discharges of the designated storm
- sewer and the discharges from municipal separate storm sewers described under subdivision 1 or
- 220 2 of this definition. In making this determination the board may consider the following factors:
- a. Physical interconnections between the municipal separate storm sewers;
- b. The location of discharges from the designated municipal separate storm sewer relative to
- 223 discharges from municipal separate storm sewers described in subdivision 1 of this definition;
- 224 c. The quantity and nature of pollutants discharged to surface waters;
- d. The nature of the receiving waters; and
- e. Other relevant factors.

- 4. The board may, upon petition, designate as a large municipal separate storm sewer system,
- 228 municipal separate storm sewers located within the boundaries of a region defined by a

September 4, 2008

stormwater management regional authority based on a jurisdictional, watershed, or other appropriate basis that includes one or more of the systems described in this definition.

"Linear development project" means a land-disturbing activity that is linear in nature such as, but not limited to, (i) the construction of electric and telephone utility lines, and natural gas pipelines; (ii) construction of tracks, rights-of-way, bridges, communication facilities and other related structures of a railroad company; and (iii) highway construction projects; and (iv) construction of stormwater channels and stream restoration activities. Private subdivision roads or streets shall not be considered linear development projects.

"Local stormwater management program" or "local program" means a statement of the various methods employed by a locality or the department to manage the quality and quantity of runoff resulting from land-disturbing activities and shall include such items as local ordinances, permit requirements, policies and guidelines, technical materials, plan review, inspection, enforcement, and evaluation consistent with the Act and this chapter. The ordinance shall include provisions to require the control of after-development stormwater runoff rate of flow, the proper maintenance of stormwater management facilities, and minimum administrative procedures.

"Locality" means a county, city, or town.

"Low Impact Development" or "LID" means a design strategy with the goal of maintaining or replicating the pre-development hydrologic regime through the use of design techniques to create a functionally equivalent hydrologic site design. Hydrologic functions of storage, infiltration and ground water recharge, as well as the volume and frequency of discharges are maintained through the use of integrated and distributed micro-scale stormwater retention and detention areas, reduction of impervious surfaces, and the lengthening of runoff flow paths and flow time. Other strategies include the preservation/protection of environmentally sensitive site features such as riparian buffers, wetlands, steep slopes, valuable (mature) trees, flood plains, woodlands, and highly permeable soils.

"Major facility" means any VSMP facility or activity classified as such by the regional administrator in conjunction with the board.

"Major modification" means, for the purposes of this chapter, the modification or amendment of an existing permit before its expiration that is not a minor modification as defined in this regulation.

"Major municipal separate storm sewer outfall" (or "major outfall)" means a municipal separate storm sewer outfall that discharges from a single pipe with an inside diameter of 36 inches or more or its equivalent (discharge from a single conveyance other than circular pipe which is associated with a drainage area of more than 50 acres); or for municipal separate storm sewers that receive stormwater from lands zoned for industrial activity (based on comprehensive zoning plans or the equivalent), with an outfall that discharges from a single pipe with an inside diameter of 12 inches or more or from its equivalent (discharge from other than a circular pipe associated with a drainage area of two acres or more).

"Man-made" "Man-made" means constructed by man.

"Man-made stormwater conveyance system" means a pipe, ditch, vegetated swale, or other conveyance constructed by man.

"Maximum daily discharge limitation" means the highest allowable daily discharge.

"Maximum extent practicable" or "MEP" means the technology-based discharge standard for municipal separate storm sewer systems established by CWA §402(p). MEP is achieved, in part, by selecting and implementing effective structural and nonstructural best management

September 4, 2008

practices (BMPs) and rejecting ineffective BMPs and replacing them with effective best management practices (BMPs). MEP is an iterative standard, which evolves over time as urban runoff management knowledge increases. As such, the operator's MS4 program must continually be assessed and modified to incorporate improved programs, control measures, BMPs, etc., to attain compliance with water quality standards.

"Medium municipal separate storm sewer system" means all municipal separate storm sewers that are either:

- 1. Located in an incorporated place with a population of 100,000 or more but less than 250,000 as determined by the 1990 decennial census by the Bureau of Census (40 CFR Part 122 Appendix G (2000));
- 2. Located in the counties listed in 40 CFR Part 122 Appendix I (2000), except municipal separate storm sewers that are located in the incorporated places, townships or towns within such counties:
- 3. Owned or operated by a municipality other than those described in subdivision 1 or 2 of this definition and that are designated by the board as part of the large or medium municipal separate storm sewer system due to the interrelationship between the discharges of the designated storm sewer and the discharges from municipal separate storm sewers described under subdivision 1 or 2 of this definition. In making this determination the board may consider the following factors:
 - a. Physical interconnections between the municipal separate storm sewers;
 - b. The location of discharges from the designated municipal separate storm sewer relative to discharges from municipal separate storm sewers described in subdivision 1 of this definition;
 - c. The quantity and nature of pollutants discharged to surface waters;
 - d. The nature of the receiving waters; or
 - e. Other relevant factors.

4. The board may, upon petition, designate as a medium municipal separate storm sewer system, municipal separate storm sewers located within the boundaries of a region defined by a stormwater management regional authority based on a jurisdictional, watershed, or other appropriate basis that includes one or more of the systems described in subdivisions 1, 2 and 3 of this definition.

"Minor modification" means, for the purposes of this chapter, minor modification or amendment of an existing permit before its expiration as specified in 4VAC50-60-640. Minor modification for the purposes of this chapter also means other modifications and amendments not requiring extensive review and evaluation including, but not limited to, changes in EPA promulgated test protocols, increasing monitoring frequency requirements, changes in sampling locations, and changes to compliance dates within the overall compliance schedules. A minor permit modification or amendment does not substantially alter permit conditions, substantially increase or decrease the amount of surface water impacts, increase the size of the operation, or reduce the capacity of the facility to protect human health or the environment.

"Municipal separate storm sewer" means a conveyance or system of conveyances otherwise known as a municipal separate storm sewer system, including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, manmade channels, or storm drains:

1. Owned or operated by a federal, state, city, town, county, district, association, or other public body, created by or pursuant to state law, having jurisdiction or delegated authority for

September 4, 2008

erosion and sediment control and stormwater management, or a designated and approved management agency under §208 of the CWA that discharges to surface waters;

- 2. Designed or used for collecting or conveying stormwater;
- 3. That is not a combined sewer; and

4. That is not part of a publicly owned treatment works.

"Municipal separate storm sewer system" or "MS4" means all separate storm sewers that are defined as "large" or "medium" or "small" municipal separate storm sewer systems or designated under 4VAC50-60-380 A 1.

"Municipal Separate Storm Sewer System Management Program" or "MS4 Program" means a management program covering the duration of a permit for a municipal separate storm sewer system that includes a comprehensive planning process that involves public participation and intergovernmental coordination, to reduce the discharge of pollutants to the maximum extent practicable, to protect water quality, and to satisfy the appropriate water quality requirements of the CWA and regulations and the Virginia Stormwater Management Act and attendant regulations, using management practices, control techniques, and system, design and engineering methods, and such other provisions that are appropriate.

"Municipality" means a city, town, county, district, association, or other public body created by or under state law and having jurisdiction over disposal of sewage, industrial wastes, or other wastes, or an Indian tribe or an authorized Indian tribal organization, or a designated and approved management agency under §208 of the CWA.

"National Pollutant Discharge Elimination System (NPDES)" or "NPDES" means the national program for issuing, modifying, revoking and reissuing, terminating, monitoring and enforcing permits, and imposing and enforcing pretreatment requirements under §§307, 402, 318, and 405 of the CWA. The term includes an approved program.

"Natural channel design concepts" means the utilization of engineering analysis and fluvial geomorphic processes to create, rehabilitate, restore, or stabilize an open conveyance system for the purpose of creating or recreating a stream that conveys its bankfull storm event within its banks and allows larger flows to access its floodplain.

"Natural stormwater conveyance system" means the main channel of a natural stream, in combination with the floodway and flood fringe, which compose the floodplain.

"Natural stream" means a tidal or nontidal watercourse that is part of the natural topography. It usually maintains a continuous or seasonal flow during the year and is characterized as being irregular in cross-section with a meandering course. Constructed channels such as drainage ditches or swales shall not be considered natural streams.

"New discharger" means any building, structure, facility, or installation:

- 1. From which there is or may be a discharge of pollutants:
- 2. That did not commence the discharge of pollutants at a particular site prior to August 13, 1979;
 - 3. Which is not a new source; and
- 4. Which has never received a finally effective VPDES or VSMP permit for discharges at that site.

This definition includes an indirect discharger that commences discharging into surface waters after August 13, 1979. It also includes any existing mobile point source (other than an offshore or coastal oil and gas exploratory drilling rig or a coastal oil and gas developmental drilling rig) such as a seafood processing rig, seafood processing vessel, or aggregate plant, that begins discharging at a site for which it does not have a permit; and any offshore or coastal mobile oil

September 4, 2008

and gas exploratory drilling rig or coastal mobile oil and gas developmental drilling rig that commences the discharge of pollutants after August 13, 1979.

"New permit" means, for the purposes of this chapter, a permit issued by the permitissuing authority to a permit applicant that does not currently hold and has never held a permit of that type, for that activity, at that location.

"New source," means any building, structure, facility, or installation from which there is or may be a discharge of pollutants, the construction of which commenced:

- 1. After promulgation of standards of performance under §306 of the CWA that are applicable to such source; or
- 2. After proposal of standards of performance in accordance with §306 of the CWA that are applicable to such source, but only if the standards are promulgated in accordance with §306 of the CWA within 120 days of their proposal.

"Nonpoint source pollution" means pollution such as sediment, nitrogen and phosphorous, hydrocarbons, heavy metals, and toxics whose sources cannot be pinpointed but rather are washed from the land surface in a diffuse manner by stormwater runoff.

"Nonpoint source pollutant runoff load" or "pollutant discharge" means the average amount of a particular pollutant measured in pounds per year, delivered in a diffuse manner by stormwater runoff.

"Operator" means the owner or operator of any facility or activity subject to regulation under the VSMP-program. In the context of stormwater associated with a large or small construction activity, operator means any person associated with a construction project that meets either of the following two criteria: (i) the person has direct operational control over construction plans and specifications, including the ability to make modifications to those plans and specifications or (ii) the person has day-to-day operational control of those activities at a project that are necessary to ensure compliance with a stormwater pollution prevention plan for the site or other permit conditions (i.e., they are authorized to direct workers at a site to carry out activities required by the stormwater pollution prevention plan or comply with other permit conditions). In the context of stormwater discharges from Municipal Separate Storm Sewer Systems (MS4s), operator means the operator of the regulated MS4 system.

"Outfall" means, when used in reference to municipal separate storm sewers, a point source at the point where a municipal separate storm sewer discharges to surface waters and does not include open conveyances connecting two municipal separate storm sewers, or pipes, tunnels or other conveyances which connect segments of the same stream or other surface waters and are used to convey surface waters.

"Overburden" means any material of any nature, consolidated or unconsolidated, that overlies a mineral deposit, excluding topsoil or similar naturally occurring surface materials that are not disturbed by mining operations.

"Owner" means the Commonwealth or any of its political subdivisions including, but not limited to, sanitation district commissions and authorities, and any public or private institution, corporation, association, firm or company organized or existing under the laws of this or any other state or country, or any officer or agency of the United States, or any person or group of persons acting individually or as a group that owns, operates, charters, rents, or otherwise exercises control over or is responsible for any actual or potential discharge of sewage, industrial wastes, or other wastes or pollutants to state waters, or any facility or operation that has the capability to alter the physical, chemical, or biological properties of state waters in contravention of §62.1-44.5 of the Code of Virginia, the Act and this chapter.

457 458

"Peak flow rate" means the maximum instantaneous flow from a prescribed design storm at a particular location.

"Percent impervious" means the impervious area within the site divided by the area of the site multiplied by 100.

"Permit" means an approval issued by the permit-issuing authority for the initiation of a land-disturbing activity or for stormwater discharges from an MS4. Permit does not include any permit that has not yet been the subject of final permit-issuing authority action, such as a draft permit or a proposed permit.

"Permit-issuing authority" means the board, the department, or a locality with a qualifying local program that is delegated authority authorized by the board to issue, deny, revoke, terminate, or amend stormwater permits under the provisions of the Act and this chapter.

"Permittee" means the person or locality to which the permit is issued, including any operator whose construction site is covered under a construction general permit.

"Person" means any individual, corporation, partnership, association, state, municipality, commission, or political subdivision of a state, governmental body (including but not limited to a federal, state, or local entity), any interstate body or any other legal entity.

"Planning area" means a designated portion of the parcel on which the land development project is located. Planning areas shall be established by delineation on a master plan. Once established, planning areas shall be applied consistently for all future projects.

"Point of discharge" means a location at which stormwater runoff is released.

"Point source" means any discernible, confined, and discrete conveyance including, but not limited to, any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, landfill leachate collection system, vessel, or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture or agricultural stormwater runoff.

"Pollutant" means dredged spoil, solid waste, incinerator residue, filter backwash, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials (except those regulated under the Atomic Energy Act of 1954, as amended (42 USC §2011 et seg.)), heat, wrecked or discarded equipment, rock, sand, cellar dirt and industrial, municipal, and agricultural waste discharged into water. It does not mean:

- 1. Sewage from vessels: or
- 2. Water, gas, or other material that is injected into a well to facilitate production of oil or gas, or water derived in association with oil and gas production and disposed of in a well if the well used either to facilitate production or for disposal purposes is approved by the board and if the board determines that the injection or disposal will not result in the degradation of ground or surface water resources.

"Pollutant discharge" means the average amount of a particular pollutant measured in pounds per year or other standard reportable unit as appropriate, delivered in a diffuse manner by stormwater runoff.

"Pollution" means such alteration of the physical, chemical or biological properties of any state waters as will or is likely to create a nuisance or render such waters (a) harmful or detrimental or injurious to the public health, safety or welfare, or to the health of animals, fish or aquatic life; (b) unsuitable with reasonable treatment for use as present or possible future sources of public water supply; or (c) unsuitable for recreational, commercial, industrial, agricultural, or other reasonable uses, provided that (i) an alteration of the physical, chemical, or biological property of state waters, or a discharge or deposit of sewage, industrial wastes or other wastes to

September 4, 2008

state waters by any owner which by itself is not sufficient to cause pollution, but which, in combination with such alteration of or discharge or deposit to state waters by other owners, is sufficient to cause pollution; (ii) the discharge of untreated sewage by any owner into state waters; and (iii) contributing to the contravention of standards of water quality duly established by the State Water Control Board, are "pollution" for the terms and purposes of this chapter.

"Post-development" refers to conditions that reasonably may be expected or anticipated to exist after completion of the land development activity on a specific site or tract of land.

"Pre-development" refers to the conditions that exist at the time that plans for the land development of a tract of land are approved by submitted to the plan approval authority. Where phased development or plan approval occurs (preliminary grading, roads and utilities, etc.), the existing conditions at the time prior to the first item being approved submitted or permitted shall establish pre-development conditions.

"Prior developed lands" means land that has been previously utilized for residential, commercial, industrial, institutional, recreation, transportation or utility facilities or structures, and that will have the impervious areas associated with those uses altered during a land disturbing activity.

"Privately owned treatment works (PVOTW)" or "PVOTW" means any device or system that is (i) used to treat wastes from any facility whose operator is not the operator of the treatment works and (ii) not a POTW.

"Proposed permit" means a VSMP permit prepared after the close of the public comment period (and, when applicable, any public hearing and administrative appeals) that is sent to EPA for review before final issuance. A proposed permit is not a draft permit.

"Publicly owned treatment works (POTW)" or "POTW" means a treatment works as defined by §212 of the CWA that is owned by a state or municipality (as defined by §502(4) of the CWA). This definition includes any devices and systems used in the storage, treatment, recycling, and reclamation of municipal sewage or industrial wastes of a liquid nature. It also includes sewers, pipes, and other conveyances only if they convey wastewater to a POTW treatment plant. The term also means the municipality as defined in §502(4) of the CWA, that has jurisdiction over the indirect discharges to and the discharges from such a treatment works.

"Qualified personnel" means a person that holds a certificate of competency from the board as a responsible land disturber, inspector, or combined administrator.

"Qualifying local stormwater management program" or "qualifying local program" means a local program that is administered by a locality that has been authorized by the board to issue coverage under the VSMP General Permit for Discharges of Stormwater from Construction Activities (4 VAC 50-60-1170).

"Recommencing discharger" means a source that recommences discharge after terminating operations.

"Regional administrator" means the Regional Administrator of Region III of the Environmental Protection Agency or the authorized representative of the regional administrator.

"Regional (watershed-wide) stormwater management facility" or "regional facility" means a facility or series of facilities designed to control stormwater runoff from a specific watershed, although only portions of the watershed may experience land development.

"Regional (watershed-wide) stormwater management plan" or "regional plan" means a document containing material describing how runoff from open space, existing development and future planned development areas within a watershed will be controlled by coordinated design and implementation of regional stormwater management facilities.

September 4, 2008

"Revoked permit" means, for the purposes of this chapter, an existing permit that is

has been designed and constructed using natural channel design concepts, including the main

"Restored stormwater conveyance system" means a stormwater conveyance system that

"Runoff coefficient" means the fraction of total rainfall that will appear at a conveyance

as runoff. "Runoff" or "stormwater runoff" means that portion of precipitation that is discharged across the land surface or through conveyances to one or more waterways. "Runoff characteristics" include, but are not limited to velocity, peak flow rate, volume,

sinuosity, channel cross-sectional area, and channel slope. "Runoff volume" means the volume of water that runs off the land development project from a prescribed design storm.

"Sand filter" means a contained bed of sand that acts to filter the first flush of runoff. The runoff is then collected beneath the sand bed and conveyed to an adequate discharge point or infiltrated into the in-situ soils.

"Schedule of compliance" means a schedule of remedial measures included in a permit, including an enforceable sequence of interim requirements (for example, actions, operations, or milestone events) leading to compliance with the Act, the CWA and regulations.

"Secretary" means the Secretary of the Army, acting through the Chief of Engineers.

"Severe property damage" means substantial physical damage to property, damage to the treatment facilities that causes them to become inoperable, or substantial and permanent loss of natural resources that can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production.

"Shallow marsh" means a zone within a stormwater extended detention basin that exists from the surface of the normal pool to a depth of six to 18 inches, and has a large surface area and, therefore, requires a reliable source of baseflow, groundwater supply, or a sizeable drainage area, to maintain the desired water surface elevations to support emergent vegetation.

"Significant materials" means, but is not limited to: raw materials; fuels; materials such as solvents, detergents, and plastic pellets; finished materials such as metallic products; raw materials used in food processing or production; hazardous substances designated under §101(14) of CERCLA (42 USC §9601(14)); any chemical the facility is required to report pursuant to §313 of Title III of SARA (42 USC §11023); fertilizers; pesticides; and waste products such as ashes, slag and sludge that have the potential to be released with stormwater discharges.

"Single jurisdiction" means, for the purposes of this chapter, a single county or city. The term county includes incorporated towns which are part of the county.

"Site" means the land or water area where any facility or activity is physically located or conducted, a parcel of land being developed, or a designated area of a parcel in which the land development project is located. Areas channelward of mean low water in tidal Virginia shall not be considered part of a site.

"Site hydrology" means the movement of water on and off the site as determined by parameters including, but not limited to, soil types, soil permeability, vegetative cover, seasonal water tables, slopes, land cover, and impervious cover.

"Small construction activity" means:

September 4, 2008

1. Construction activities including clearing, grading, and excavating that results in land disturbance of equal to or greater than one acre, or equal to or greater than 2,500 square feet in all areas of the jurisdictions designated as subject to the Chesapeake Bay Preservation Area Designation and Management Regulations adopted pursuant to the Chesapeake Bay Preservation Act, and less than five acres. Small construction activity also includes the disturbance of less than one acre of total land area that is part of a larger common plan of development or sale if the larger common plan will ultimately disturb equal to or greater than one and less than five acres. Small construction activity does not include routine maintenance that is performed to maintain the original line and grade, hydraulic capacity, or original purpose of the facility. The board may waive the otherwise applicable requirements in a general permit for a stormwater discharge from construction activities that disturb less than five acres where stormwater controls are not needed based on a "total maximum daily load" (TMDL) approved or established by EPA that addresses the pollutant(s) of concern or, for nonimpaired waters that do not require TMDLs, an equivalent analysis that determines allocations for small construction sites for the pollutant(s) of concern or that determines that such allocations are not needed to protect water quality based on consideration of existing in-stream concentrations, expected growth in pollutant contributions from all sources, and a margin of safety. For the purpose of this subdivision, the pollutant(s) of concern include sediment or a parameter that addresses sediment (such as total suspended solids, turbidity or siltation) and any other pollutant that has been identified as a cause of impairment of any water body that will receive a discharge from the construction activity. The operator must certify to the board that the construction activity will take place, and stormwater discharges will occur, within the drainage area addressed by the TMDL or equivalent analysis.

2. Any other construction activity designated by the either the board or the EPA regional administrator, based on the potential for contribution to a violation of a water quality standard or for significant contribution of pollutants to surface waters.

"Small municipal separate storm sewer system" or "small MS4" means all separate storm sewers that are (i) owned or operated by the United States, a state, city, town, borough, county, parish, district, association, or other public body (created by or pursuant to state law) having jurisdiction over disposal of sewage, industrial wastes, stormwater, or other wastes, including special districts under state law such as a sewer district, flood control district or drainage district, or similar entity, or an Indian tribe or an authorized Indian tribal organization, or a designated and approved management agency under §208 of the CWA that discharges to surface waters and (ii) not defined as "large" or "medium" municipal separate storm sewer systems or designated under 4VAC50-60-380 A 1. This term includes systems similar to separate storm sewer systems in municipalities, such as systems at military bases, large hospital or prison complexes, and highway and other thoroughfares. The term does not include separate storm sewers in very discrete areas, such as individual buildings.

"Source" means any building, structure, facility, or installation from which there is or may be a discharge of pollutants.

"Stable" means, in the context of channels, a channel that has developed an established dimension, pattern and profile such that over time, these features are maintained.

"State" means the Commonwealth of Virginia.

"State/EPA agreement" means an agreement between the regional administrator and the state that coordinates EPA and state activities, responsibilities and programs including those under the CWA and the Act.

September 4, 2008

"State project" means any land development project that is undertaken by any state

agency, board, commission, authority or any branch of state government, including statesupported institutions of higher learning. "State Water Control Law" means Chapter 3.1 (§62.1-44.2 et seq.) of Title 62.1 of the Code of Virginia.

"State waters" means all water, on the surface and under the ground, wholly or partially within or bordering the Commonwealth or within its jurisdiction, including wetlands.

"Stormwater" means precipitation that is discharged across the land surface or through conveyances to one or more waterways and that may include stormwater runoff, snow melt runoff, and surface runoff and drainage.

"Stormwater conveyance system" means any of the following, either within or downstream of the land disturbing activity: (1) a man-made stormwater conveyance system; (2) a natural stormwater conveyance system; or (3) a restored stormwater conveyance system.

"Stormwater detention basin" or "detention basin" means a stormwater management facility that temporarily impounds runoff and discharges it through a hydraulic outlet structure to a downstream conveyance system. While a certain amount of outflow may also occur via infiltration through the surrounding soil, such amounts are negligible when compared to the outlet structure discharge rates and are, therefore, not considered in the facility's design. Since a detention facility impounds runoff only temporarily, it is normally dry during nonrainfall periods.

"Stormwater discharge associated with construction activity" means a discharge of pollutants in stormwater runoff from areas where land-disturbing activities (e.g., clearing, grading, or excavation); construction materials or equipment storage or maintenance (e.g., fill piles, borrow area, concrete truck washout, fueling); or other industrial stormwater directly related to the construction process (e.g., concrete or asphalt batch plants) are located.

"Stormwater discharge associated with large construction activity" means the discharge of stormwater from large construction activities.

"Stormwater discharge associated with small construction activity" means the discharge of stormwater from small construction activities.

"Stormwater extended detention basin" or "extended detention basin" means a stormwater management facility that temporarily impounds runoff and discharges it through a hydraulic outlet structure over a specified period of time to a downstream conveyance system for the purpose of water quality enhancement or stream channel erosion control. While a certain amount of outflow may also occur via infiltration through the surrounding soil, such amounts are negligible when compared to the outlet structure discharge rates and, therefore, are not considered in the facility's design. Since an extended detention basin impounds runoff only temporarily, it is normally dry during nonrainfall periods.

"Stormwater extended detention basin-enhanced" or "extended detention basin-enhanced" means an extended detention basin modified to increase pollutant removal by providing a shallow marsh in the lower stage of the basin.

"Stormwater management facility" means a device that controls stormwater runoff and changes the characteristics of that runoff including, but not limited to, the quantity and quality, the period of release or the velocity of flow.

"Stormwater management plan" means a document(s) containing material for describing how existing runoff characteristics will be maintained by a land-disturbing activity and methods for complying with the requirements of the local program or this chapter.

September 4, 2008

"Stormwater Management Program" means a program established by a locality that is consistent with the requirements of the Virginia Stormwater Management Act, this chapter and associated guidance documents.

"Stormwater management standards" means the minimum criteria for stormwater management programs and land-disturbing activities as set out in Part II of these regulations.

"Stormwater Pollution Prevention Plan" (SWPPP) or "plan SWPPP" means a document that is prepared in accordance with good engineering practices and that identifies potential sources of pollution pollutants that may reasonably be expected to affect the quality of stormwater discharges from the construction site or its associated land-disturbing activities. In addition the document shall describe and ensure the implementation of best management practices control measures, and shall include, but not be limited to the inclusion of, or the incorporation by reference of, an erosion and sediment control plan, a post-construction stormwater management plan, a spill prevention control and countermeasure (SPCC) plan, and other practices that will be used to reduce pollutants in stormwater discharges from land-disturbing activities and to assure compliance with the terms and conditions of this chapter. All plans incorporated by reference into the SWPPP shall be enforceable under the permit issued or general permit coverage authorized.

"Stormwater retention basin" or "retention basin" means a stormwater management facility that includes a permanent impoundment, or normal pool of water, for the purpose of enhancing water quality and, therefore, is normally wet, even during nonrainfall periods. Storm runoff inflows may be temporarily stored above this permanent impoundment for the purpose of reducing flooding, or stream channel erosion.

"Stormwater retention basin I" or "retention basin I" means a retention basin with the volume of the permanent pool equal to three times the water quality volume.

"Stormwater retention basin II" or "retention basin II" means a retention basin with the volume of the permanent pool equal to four times the water quality volume.

"Stormwater retention basin III" or "retention basin III" means a retention basin with the volume of the permanent pool equal to four times the water quality volume with the addition of an aquatic bench.

"Subdivision" means the same as defined in §15.2-2201 of the Code of Virginia.

"Surface waters" means:

- 1. All waters that are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters that are subject to the ebb and flow of the tide;
 - 2. All interstate waters, including interstate wetlands:
- 3. All other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds the use, degradation, or destruction of which would affect or could affect interstate or foreign commerce including any such waters:
 - a. That are or could be used by interstate or foreign travelers for recreational or other purposes;
 - b. From which fish or shellfish are or could be taken and sold in interstate or foreign commerce; or
 - c. That are used or could be used for industrial purposes by industries in interstate commerce.
 - 4. All impoundments of waters otherwise defined as surface waters under this definition;

September 4, 2008

- 5. Tributaries of waters identified in subdivisions 1 through 4 of this definition;
- 6. The territorial sea; and

7. Wetlands adjacent to waters (other than waters that are themselves wetlands) identified in subdivisions 1 through 6 of this definition.

Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of the CWA and the law, are not surface waters. Surface waters do not include prior converted cropland. Notwithstanding the determination of an area's status as prior converted cropland by any other agency, for the purposes of the Clean Water Act, the final authority regarding the Clean Water Act jurisdiction remains with the EPA.

"Total dissolved solids" means the total dissolved (filterable) solids as determined by use of the method specified in 40 CFR Part 136 (2000).

"Total maximum daily load" or "TMDL" means the sum of the individual wasteload allocations for point sources, load allocations (LAs) for nonpoint sources, natural background loading and a margin of safety. TMDLs can be expressed in terms of either mass per time, toxicity, or other appropriate measure. The TMDL process provides for point versus nonpoint source trade-offs.

"Toxic pollutant" means any pollutant listed as toxic under §307(a)(1) of the CWA or, in the case of sludge use or disposal practices, any pollutant identified in regulations implementing §405(d) of the CWA.

"Unstable" means, in the context of channels, a channel that is not stable.

"Upset" means an exceptional incident in which there is unintentional and temporary noncompliance with technology based permit effluent limitations because of factors beyond the reasonable control of the operator. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.

"Variance" means any mechanism or provision under §301 or §316 of the CWA or under 40 CFR Part 125 (2000), or in the applicable effluent limitations guidelines that allows modification to or waiver of the generally applicable effluent limitation requirements or time deadlines of the CWA. This includes provisions that allow the establishment of alternative limitations based on fundamentally different factors or on §301(c), §301(g), §301(h), §301(i), or §316(a) of the CWA.

"Vegetated filter strip" means a densely vegetated section of land engineered to accept runoff as overland sheet flow from upstream development. It shall adopt any natural vegetated form, from grassy meadow to small forest. The vegetative cover facilitates pollutant removal through filtration, sediment deposition, infiltration and absorption, and is dedicated for that purpose.

"Virginia Pollutant Discharge Elimination System (VPDES) permit" or "VPDES permit" means a document issued by the State Water Control Board pursuant to the State Water Control Law authorizing, under prescribed conditions, the potential or actual discharge of pollutants from a point source to surface waters and the use or disposal of sewage sludge.

"Virginia Stormwater Management Act" or "Act" means Article 1.1 (§ 10.1-603.1 et seq.) of Chapter 6 of Title 10.1 of the Code of Virginia.

"Virginia Stormwater BMP Clearinghouse website" means a website that contains detailed design standards and specifications for BMPs that may be used in Virginia to comply with requirements of the Act and associated regulations and that is jointly created by the

September 4, 2008

<u>department and the Virginia Water Resources Research Center subject to advice from a permanent stakeholder advisory committee.</u>

"Virginia Stormwater Management Handbook" means a collection of pertinent information that provides general guidance for compliance with the Act and associated regulations and is developed by the department with advice from a stakeholder advisory committee.

"Virginia Stormwater Management Program (VSMP)" or "VSMP" means the Virginia program for issuing, modifying, revoking and reissuing, terminating, monitoring and enforcing permits, and imposing and enforcing requirements pursuant to the federal Clean Water Act CWA, the Virginia Stormwater Management Act, this chapter, and associated guidance documents.

"Virginia Stormwater Management Program (VSMP) permit" or "VSMP permit" means a document issued by the permit-issuing authority pursuant to the Virginia Stormwater Management Act and this chapter authorizing, under prescribed conditions, the potential or actual discharge of pollutants from a point source to surface waters. Under the approved state program, a VSMP permit is equivalent to a NPDES permit.

"VSMP application" or "application" means the standard form or forms, including any additions, revisions or modifications to the forms, approved by the administrator and the board for applying for a VSMP permit.

"Wasteload allocation" or "wasteload" or "WLA" means the portion of a receiving surface water's loading or assimilative capacity allocated to one of its existing or future point sources of pollution. WLAs are a type of water quality-based effluent limitation.

"Water quality standards" or "WQS" means provisions of state or federal law that consist of a designated use or uses for the waters of the Commonwealth and water quality criteria for such waters based on such uses. Water quality standards are to protect the public health or welfare, enhance the quality of water, and serve the purposes of the State Water Control Law (§62.1-44.2 et seq. of the Code of Virginia), the Virginia Stormwater Management Act (§10.1-603.1 et seq. of the Code of Virginia), and the CWA federal Clean Water Act (33 USC §1251 et seq.).

"Water quality volume" means the volume equal to the first 1/2 inch of runoff multiplied by the impervious surface of the land development project.

"Watershed" means a defined land area drained by a river or stream, <u>karst system</u>, or system of connecting rivers or streams such that all surface water within the area flows through a single outlet. <u>In karst areas</u>, the <u>karst feature to which the water drains may be considered the single outlet for the watershed</u>.

"Wetlands" means those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.

"Whole effluent toxicity" means the aggregate toxic effect of an effluent measured directly by a toxicity test.

4VAC50-60-20. Purposes.

The purposes of this chapter are to provide a framework for the administration, implementation and enforcement of the <u>Virginia Stormwater Management</u> Act (Act) and to delineate the procedures and requirements to be followed in connection with VSMP permits

September 4, 2008

779 issued by the board or its designee pursuant to the Clean Water Act (CWA) and the Virginia 780 Stormwater Management Act, while at the same time providing flexibility for innovative 781 solutions to stormwater management issues. The chapter also establishes the board's procedures 782 for the authorization of a qualifying local program, board and department oversight authorities 783 for an authorized qualifying local program, the board's procedures for utilization by the 784 department in administering a local program in localities where no qualifying local program is 785 authorized, and the components of a stormwater management program including but not limited 786 to stormwater management standards.

4VAC50-60-30. Applicability.

This chapter is applicable to:

- 1. Every private, local, state, or federal entity that establishes a stormwater management program or a MS4 Program;
- 2. The department in its oversight of locally administered programs or in its administration of a local program;
 - 2. 3. Every state agency project regulated under the Act and this chapter; and
- 3. 4. Every land-disturbing activity regulated under § 10.1-603.8 of the Code of Virginia unless otherwise exempted in 10.1-603.8 subsection B.

September 4, 2008

Part II Stormwater Management Program Technical Criteria

4VAC50-60-40. Authority and applicability.

This part specifies technical criteria for every stormwater management program and landdisturbing activity.

Pursuant to the Virginia Stormwater Management Act. § 10.1-603.2 et seq. of the Code

Pursuant to the Virginia Stormwater Management Act, § 10.1-603.2 et seq. of the Code of Virginia, the board is required to take actions ensuring the general health, safety and welfare of the citizens of the Commonwealth as well as protecting the quality and quantity of state waters from the potential harm of unmanaged stormwater. In addition to other authority granted to the board under the Stormwater Management Act, the board is authorized pursuant to §§ 10.1-603.2:1 and 10.1-603.4 to adopt regulations that specify minimum technical criteria for stormwater management programs in Virginia, to establish statewide standards for stormwater management from land disturbing activities, and to protect properties, the quality and quantity of state waters, the physical integrity of stream channels, and other natural resources.

In accordance with the board's authority, this part establishes the minimum technical criteria and stormwater management standards that shall be employed by a state agency in accordance with an implementation schedule set by the board, or by a qualifying local program or department administered local stormwater management program that has been approved by the board, to protect the quality and quantity of state waters from the potential harm of unmanaged stormwater runoff resulting from land disturbing activities.

4VAC50-60-50. General. Repeal

4VAC50-60-53. General Objectives

The physical, chemical, biological and hydrologic characteristics and the water quality and quantity of the receiving state waters shall be maintained, protected, or improved in accordance with the requirements of this part. Objectives include, but are not limited to, supporting state designated uses and water quality standards. All control measures used shall be employed in a manner which minimizes impacts on receiving state waters.

4VAC50-60-56. Applicability of other laws and regulations

Nothing in this chapter shall be construed as limiting the applicability of other laws and regulations, including, but not limited to, the CWA, Virginia Stormwater Management Act, Virginia Erosion and Sediment Control Law and the Chesapeake Bay Preservation Act except as provided in § 10.1-603.3 subsection I and all applicable regulations adopted in accordance with those laws, or the rights of other federal agencies, state agencies, or local governments to impose more stringent technical criteria or other requirements as allowed by law.

4VAC50-60-60. Water quality. Repeal

4VAC50-60-63. Water Quality Criteria Requirements

A. In order to protect the quality of state waters and to control nonpoint source pollution, the following minimum technical criteria and statewide standards for stormwater management shall be applied to the site of a land disturbing activity. The local program shall have discretion to allow for application of the criteria to each drainage area of the site. However, where a site

September 4, 2008

drains to more than one HUC, the pollutant load reduction requirements shall be applied independently within each HUC, unless reductions are achieved in accordance with a comprehensive watershed stormwater management plan in accordance with 4VAC50-60-96.

- 1. New development. The total phosphorus load of new development projects shall not exceed 0.28 pounds per acre per year.
- 2. Development on prior developed lands. The total phosphorus load of projects occurring on prior developed lands shall be reduced to an amount at least 20% below the pre-development total phosphorus load. However, the total phosphorus load shall not be required to be reduced to below 0.28 pounds per acre per year unless a more stringent standard has been established by a qualifying local program.
- 3. Compliance with the requirements of subdivisions A1 and A2 shall be determined in accordance with 4VAC50-60-65.
- 4. TMDL. In addition to the above requirements, if a specific WLA for a pollutant has been established in a TMDL and is assigned to stormwater discharges from a land disturbing activity, necessary control measures must be implemented by the operator to meet the WLA in accordance with the requirements established in the General Permit for Discharges of Stormwater from Construction Activities or an individual permit, which address both construction and post-construction discharges.

4VAC50-60-65. Water Quality Compliance

A. Compliance with the water quality criteria set out in 4VAC 50-60-63 subdivisions A1 and A2 shall be determined by utilizing the Pollutant - Runoff Reduction Method contained within the Virginia Stormwater Management Handbook or another methodology that is demonstrated by the qualifying local program to achieve equivalent results and is approved by the local program and the board.

B. The BMPs listed in Table 1 or the BMPs available on the Virginia Stormwater BMP Clearinghouse website shall be utilized as necessary to effectively reduce the phosphorus load in accordance with the Pollutant-Runoff Reduction Method.

<u>Table 1</u> BMP Pollutant Removal Efficiencies

C. BMPs differing from those listed in Table 1 shall be reviewed and approved in accordance with procedures established by the BMP Clearinghouse Committee and have been set out in board approved guidance.

D. A qualifying local program may establish use limitations on specific BMPs following the submission of the proposed use limitation and written justification to the department.

E. Where the land disturbing activity only occurs on a portion of the site, the local program may review the stormwater management plan based upon the portion of the site that is proposed to be developed, provided that the local program has established guidance for such a review. Such portion shall be deemed to include any area left undeveloped pursuant to any local requirement or proffer accepted by a locality. Any such guidance shall be provided to the department.

F. If a comprehensive watershed stormwater management plan has been adopted pursuant to 4VAC50-60-96 for the watershed within which a project is located, then the qualifying local program may allow off-site controls in accordance with the plan to achieve the post-development pollutant load water quality technical criteria set out in 4VAC-60-63 subdivisions A1 and A2. Such off-site controls shall achieve the required pollutant reductions either completely off-site in accordance with the plan or in a combination of on-site and off-site controls.

September 4, 2008

- 892 <u>G. Where no plan exists pursuant to subsection F, off-site controls may be used to meet</u>
 893 <u>the post-development pollutant load water quality technical criteria set out in 4VAC50-60-63</u>
 894 <u>subdivisions A1 and A2 provided:</u>
 - 1. The local program allows for off-site controls;
 - 2. The applicant demonstrates to the satisfaction of the local program that off-site reductions equal to or greater than those that would otherwise be required for the site are achieved;
 - 3. The applicant demonstrates to the satisfaction of the local program that the development's runoff and the runoff from any off-site treatment area shall be controlled in accordance with 4VAC50-60-66;
 - 4. Off-site controls must be located within the same HUC or the adjacent downstream HUC to the land disturbing site; and
 - 5. The applicant demonstrates to the satisfaction of the local program that the right to utilize the off-site control area and any necessary easements have been obtained and maintenance agreements for the stormwater management facilities have been established pursuant to 4VAC50-60-108.
 - H. Alternatively, the local program may waive the requirements of subdivisions A1 and A2 of 4VAC50-60-63 through the granting of an exception pursuant to 4VAC50-60-122.

4VAC 50-60-66 Water Quantity

<u>Channel protection and flood protection shall be addressed in accordance with the minimum standards set out in this section, which are established pursuant to the requirements of \$10.1-603.4(7).</u>

- A. Channel protection. Concentrated stormwater flow shall be discharged into a stormwater conveyance system and shall meet one of the following criteria as demonstrated by use of accepted hydrologic and hydraulic methodologies:
- 1. Discharges to man-made stormwater conveyance systems. The point of discharge releases stormwater into a man-made stormwater conveyance system that, following the land disturbing activity, conveys the post-development peak flow rate from the 2-year 24-hour storm without causing erosion of the system.
- 2. Discharges to restored stormwater conveyance systems. The point of discharge releases stormwater into a stormwater conveyance system that (i) has been restored and is functioning as designed or (ii) will be restored. The applicant must demonstrate that the runoff following the land disturbing activity, in combination with other existing stormwater runoff, will not exceed the design of the restored stormwater conveyance system nor result in instability of the system.
- 3. Discharges to stable natural stormwater conveyance systems. The point of discharge releases stormwater into a natural stormwater conveyance system that is stable and, following the land disturbing activity, (i) will not become unstable as a result of the discharge from the one-year 24 hour storm, and (ii) provides a peak flow rate from the one-year 24 hour storm calculated as follows or in accordance with another methodology that is demonstrated by the local program to achieve equivalent results and is approved by the board:

 $\underline{Q_{Developed} * RV_{Developed}} \le \underline{Q_{Pre-Developed} * RV_{Pre-Developed}}$, where

 $Q_{Developed} =$

971	within the man-made stormwater con-	
972	2. Discharges to restored storn	nwater conveyance systems. The point of discharge
973	releases stormwater into a stormwater	r conveyance system that (i) has been restored and is
974	functioning as designed or (ii) will be	restored. The applicant must demonstrate that the peak

3. Discharges to natural stormwater conveyance systems. The point of discharge releases stormwater into a natural stormwater conveyance system that currently does not flood during the 10-year 24-hour storm and, following the land disturbing activity, confines the post-development peak flow rate from the 10-year 24-hour storm within the system.

flow rate from the 10-year 24-hour storm following the land disturbing activity will be confined

4. Discharges to natural stormwater conveyance systems where localized flooding exists during the 10-year 24-hour storm. The point of discharge releases a post-development peak flow

September 4, 2008

rate for the 10-year 24-hour storm that shall not exceed the pre-development peak flow rate from the 10-year 24-hour storm based on forested conditions.

- 5. A local program may adopt alternate flood protection design criteria that (i) achieves equivalent results, (ii) is based upon geographic, land use, topographic, geologic or other downstream conveyance factors, and (iii) is approved by the board.
- <u>C. One percent rule. If either of the following criteria is met, subsections A and B do not apply:</u>
- 1. Based on area. Prior to any land disturbance, the site's contributing drainage area to a point of discharge from the site is less than or equal to one (1) percent of the total watershed area draining to that point of discharge; or
- 2. Based on discharge. Based on the post-development land cover conditions prior to the implementation of any stormwater quantity control measures, the development of the site results in an increase in the peak flow rate from the one-year 24-hour storm that is less than one (1) percent of the existing peak flow rate from the one-year 24-hour storm generated by the total watershed area draining to that point of discharge.
- D. Increased volumes of sheet flow resulting from pervious or disconnected impervious areas, or from physical spreading of concentrated flow through level spreaders, must be identified and evaluated for potential impacts on down gradient properties or resources. Increased volumes of sheet flow that will cause or contribute to erosion, sedimentation or flooding of down gradient properties or resources shall be diverted to a detention facility or a stormwater conveyance system that conveys the runoff without causing down gradient erosion, sedimentation, or flooding. If all runoff from the site is sheet flow and the conditions of this subsection are met, no further water quantity controls are required.
- E. For purposes of computing predevelopment runoff from prior developed sites, all pervious lands on the site shall be assumed to be in good hydrologic condition in accordance with NRCS standards, regardless of conditions existing at the time of computation.

 Predevelopment runoff calculations utilizing other hydrologic conditions may be utilized provided that it is demonstrated to and approved by the local program that actual site conditions warrant such considerations.
- F. Pre-development runoff characteristics and site hydrology shall be verified by site inspections, topographic surveys, available soil mapping or studies, and calculations consistent with good engineering practices in accordance with guidance provided in the Virginia Stormwater Management Handbook and by the qualifying local program.
- G. Except where the compliance options under subdivisions A 4 and B 4 of this section are utilized, flooding and channel erosion impacts to stormwater conveyance systems shall be analyzed for each point of discharge in accordance with channel analysis guidance provided in Technical Bulletin # 1, Stream Channel Erosion Control, or in accordance with more stringent channel analysis guidance established by the qualifying local program and provided to the department. Such analysis shall include estimates of runoff from the developed site and the entire upstream watershed which contributes to that point of discharge. Good engineering practices and calculations in accordance with DCR guidance shall be used to evaluate post development runoff characteristics and site hydrology, and flooding and channel erosion impacts.

If the downstream owner or owners refuse to give permission to access the property for the collection of data, evidence of this refusal shall be given and arrangements made satisfactory to the local program to provide an alternative method for the collection or data to complete the

September 4, 2008

analysis, such as through the use of photos, aerial surveys, "as built" plans, topographic maps, soils maps, and any other relevant information.

4VAC50-60-70. Stream channel erosion. Repeal

4VAC50-60-72. Design Storms and Hydrologic Methods

A. Unless otherwise specified, the prescribed design storms are the 1-year, 2-year, and 10-year 24-hour storms using the site-specific rainfall precipitation frequency data recommended by the U.S. National Oceanic and Atmospheric Administration (NOAA) Atlas 14. Partial duration time series shall be used for the precipitation data.

B. All hydrologic analyses shall be based on the existing watershed characteristics and the ultimate development condition of the subject project.

C. The U.S. Department of Agriculture's Natural Resources Conservation Service (NRCS) synthetic 24-hour rainfall distribution and models, including, but not limited to TR-55 and TR-20; hydrologic and hydraulic methods developed by the U.S. Army Corps of Engineers; or other standard hydrologic and hydraulic methods, shall be used to conduct the analyses described in this Part. The local program may allow for the use of the Rational Method for evaluating peak discharges or the Modified Rational Method for evaluating volumetric flows to stormwater conveyances with drainage areas of 200 acres or less.

4VAC50-60-74. Stormwater harvesting

In accordance with § 10.1-603.4 of the Code of Virginia, stormwater harvesting is encouraged for the purposes of landscape irrigation systems, fire protection systems, flushing water closets and urinals, and other water handling systems to the extent such systems are feasible, reasonable, and consistent with federal, state and local regulatory authorities.

4VAC50-60-76. Linear development projects

1056 <u>Unless exempt pursuant to §10.1-603.8 subsection B, linear development projects shall</u>
1057 <u>control post-development stormwater runoff in accordance with a site-specific stormwater</u>
1058 <u>management plan or a comprehensive watershed stormwater management plan developed in</u>
1059 <u>accordance with these regulations.</u>

4VAC50-60-80. Flooding. Repeal

4VAC50-60-85. Stormwater management impoundment structures or facilities

A. Construction of stormwater management impoundment structures or facilities within tidal or nontidal wetlands and perennial streams is not recommended.

B. Construction of stormwater management impoundment structures or facilities within a Federal Emergency Management Agency (FEMA) designated 100-year floodplain should be avoided. When this is demonstrated to be unavoidable, all stormwater management facility construction shall be in compliance with all applicable requirements under the National Flood Insurance Program, 44 CFR Parts 59 and 60 and local floodplain ordinances.

C. Stormwater management impoundment structures that are not covered by the
Impounding Structure Regulations (4VAC50-20) shall be engineered for structural integrity and
spillway design for the 100-year storm event. In no case shall the design standard be less than

September 4, 2008

the 100-year storm event for any stormwater management impoundment structure. This provision does not apply to underground stormwater management structures.

D. Construction of stormwater management impoundment structures or facilities may occur in karst areas only after a geological study of the area has been conducted to determine the presence or absence of karst features that may be impacted by stormwater runoff and BMP placement.

E. Discharge of stormwater runoff to a karst feature shall meet the water quality criteria set out in 4 VAC 50-60-63 and the water quantity criteria set out in 4 VAC 50-60-66. Permanent stormwater management impoundment structures or facilities shall only be constructed in karst features after completion of a geotechnical investigation that identifies any necessary modifications to the BMP to ensure its structural integrity and maintain its water quality and quantity efficiencies. The person responsible for the land disturbing activity is encouraged to screen for known existence of heritage resources in the karst features. Any Class V Underground Injection Control Well registration statements for stormwater discharges to improved sinkholes shall be included in the SWPPP.

4VAC50-60-90. Regional (watershed-wide) stormwater management plans. Repeal

4VAC50-60-93. Stormwater Management Plan Development

A. A stormwater management plan for a land disturbing activity shall apply these stormwater management technical criteria to the entire land disturbing activity.

B. Individual lots or planned phases of developments shall not be considered separate land-disturbing activities, but rather the entire development shall be considered a single land disturbing activity.

<u>C.</u> The stormwater management plan shall consider all sources of surface runoff and all sources of subsurface and groundwater flows converted to surface runoff.

4VAC50-60-96. Comprehensive watershed stormwater management plans

A. Local programs may develop comprehensive watershed stormwater management plans to be approved by the board that meet the water quality objectives, quantity objectives, or both of this chapter. Such plans shall ensure that offsite reductions equal to or greater than those that would be required on each contributing land disturbing site are achieved within the same HUC, or within another locally designated watershed.

State and federal agencies intending to develop large tracts of land may participate in comprehensive watershed stormwater management plans where practicable. During the plan's implementation, the local program shall account for nutrient reductions accredited to the BMPs specified in the plan. Pertaining to water quantity objectives, the plan may provide for implementation of a combination of channel improvement, stormwater detention, or other measures which is satisfactory to the local program to prevent downstream erosion and flooding. If the land use assumptions upon which the plan was based changes or if any other amendments are deemed necessary by the local program, the local program shall provide plan amendments to the board for review and approval.

B. If the local program allows for a pro rata fee in accordance with § 15.2-2243 of the Code of Virginia, then the reductions required for a site by this chapter may be achieved by the payment of a pro rata fee sufficient to fund improvements necessary to adequately achieve those requirements in accordance with that section of the Code and this chapter.

1140	
1141	4VAC50-60-102. Authority and Applicability.
1142	If a locality has adopted a local stormwater management program in accordance with the
1143	Virginia Stormwater Management Act, §10.1-603.2 et seq. and the board has deemed such
1144	program adoption consistent with the Virginia Stormwater Management Act and these
1145	regulations in accordance with §10.1-603.3 subsection F, the board may authorize a locality to
1146	administer a qualifying local program. Pursuant to §10.1-603.4, the board is required to establish
1147	standards and procedures for such an authorization.
1148	This part specifies the minimum technical criteria and the local government ordinance
1149	requirements for a local program to be considered as a qualifying local program. Such criteria
1150	include but are not limited to administration, plan review, issuance of coverage under the
1151	Virginia Stormwater Management Program (VSMP) General Permit for Discharges of
1152	Stormwater from Construction Activities, inspection, and enforcement.
1153	
1154	4VAC50-60-104. Technical criteria for qualifying local programs.
1155	A. All qualifying local programs shall require compliance with the provisions of Part II
1156	(4VAC50-60-40 et seq.) unless an exception is granted pursuant to 4VAC50-60-122 and shall
1157	comply with the requirements of 4VAC50-60-460 subsection L.
1158	B. When a locality operating a qualifying local program has adopted requirements more
1159	stringent than those imposed by this chapter in accordance with §10.1-603.7 or implemented a
1160	comprehensive stormwater management plan, the department shall consider such requirements in
1161	its review of state projects within that locality in accordance with Part IV of these regulations
1162	(4VAC50-60-160 et seq.).
1163	C. Nothing in this part shall be construed as authorizing a locality to regulate, or to
1164	require prior approval by the locality for, a state project.
1165	
1166	4VAC50-60-106. Qualifying local program administrative requirements.
1167	A. A qualifying local program shall provide for the following:
1168	1. Identification of the authority authorizing coverage under the VSMP General Permit
1169	for Discharges of Stormwater from Construction Activities (4 VAC 50-60-1170), the plan

1170	reviewing authority, the plan approving authority, the inspection authority, and the enforcement
1171	authority;
1172	2. Technical criteria to be used in the qualifying local program;
1173	3. Procedures for the submission and approval of plans;
1174	4. Inspection and monitoring of land disturbing activities covered by a permit for
1175	compliance;
1176	5. Procedures or policies for long-term inspection and maintenance of stormwater
1177	management facilities; and
1178	<u>6. Enforcement.</u>
1179	B. A locality shall adopt an ordinance(s) that incorporates the components set out in
1180	subsection A and consent to follow procedures provided by the department for the issuance,
1181	denial, revocation, termination, reissuance, transfer, or modifications of coverage under the
1182	VSMP General Permit for Discharges of Stormwater from Construction Activities.
1183	C. A qualifying local program shall report to the department information related to the
1184	administration and implementation of the qualifying local program in accordance with 4VAC50-
1185	<u>60-126.</u>
1186	D. A qualifying local program may require the submission of a reasonable performance
1187	bond or other financial surety and for the release of such sureties in accordance with the criteria
1188	set forth in §10.1-603.8.
1189	
1190	4VAC50-60-108. Qualifying local program stormwater management plan review.
1191	A. A qualifying local program shall require stormwater management plans to be
1192	submitted for review and be approved prior to commencement of land disturbing activities.
1193	B. A qualifying local program shall approve or disapprove a stormwater management
1194	plan and required accompanying information according to the following:
1195	1. Stormwater management plan review shall begin upon submission of a complete plan.
1196	A complete plan shall include the following elements:
1197	a. The location of all points of stormwater discharge, receiving surface waters or karst
1198	features into which the stormwater discharges, and pre-development and post-development
1199	conditions for drainage areas, including final drainage patterns and changes to existing contours;
1200	b. Contact Information including the name, address, and telephone number of the
1201	property owner and the tax reference number and parcel number of the property or properties
1202	affected;
1203	c. A narrative that includes a description of current site conditions and proposed
1204	development and final site conditions, including proposed stormwater management facilities and
1205	the mechanism, including an identification of financially responsible parties, through which the
1206	facilities will be operated and maintained during and after construction activity;
1207	d. The location and the design of the proposed stormwater management facilities;
1208	e. Information identifying the hydrologic characteristics and structural properties of soils
1209	utilized with the installation of stormwater management facilities;
1210	f. Hydrologic and hydraulic computations of the pre-development and post-development
1211	runoff conditions for the required design storms;
1212	g. Good engineering practices and calculations verifying compliance with the water
1213	quality and quantity requirements of this chapter;
1214	h. A map(s) of the site which depicts the topography of the site and includes:
1215	(i) all contributing drainage areas;

September 4, 2008

1216 (ii) receiving surface waters or karst features into which stormwater will be discharged: (iii) existing streams, ponds, culverts, ditches, wetlands, and other water bodies; 1217 1218 (iv) soil types, geologic formations, forest cover, other vegetative areas; 1219 (v) current land use including existing structures, roads, and locations of known utilities 1220 and easements; 1221 (vi) sufficient information on adjoining parcels to assess the impacts of stormwater from 1222 the site: 1223 (vii) the limits of clearing and grading, and the proposed drainage patterns on the site; 1224 (viii) proposed buildings, roads, parking areas, utilities, and stormwater management 1225 facilities; and 1226 (ix) proposed land use with tabulation of the percentage of surface area to be adapted to 1227 various uses, including but not limited to planned locations of utilities, roads and easements. 1228 i. Fifty percent of the required fee in accordance with 4VAC50-60-820 and the required 1229 fee form must have been submitted. 1230 2. Elements of the stormwater management plans shall be appropriately sealed and signed 1231 by a professional in adherence to all minimum standards and requirements pertaining to the 1232 practice of that profession in accordance with Chapter 4 of Title 54.1 of the Code of Virginia and 1233 attendant regulations. 1234 3. Completeness of a plan and required accompanying information shall be determined 1235 by the qualifying local program, and the applicant shall be notified of any determination, within 1236 15 calendar days of receipt. 1237 a. If within those 15 days the plan is deemed to be incomplete based on the criteria set out in subsection B of this section, the applicant shall be notified in writing of the reasons the plan is 1238 1239 deemed incomplete. 1240 b. If a determination of completeness is made and communicated to the applicant within 1241 the 15 calendar days, an additional 60 calendar days from the date of the communication will be 1242 allowed for the review of the plan. 1243 c. If a determination of completeness is not made and communicated to the applicant 1244 within the 15 calendar days, the plan shall be deemed complete as of the date of submission and 1245 a total of 60 calendar days from the date of submission will be allowed for the review of the plan. 1246 d. The qualifying local program shall act within 45 days on any plan that has been 1247 previously disapproved and resubmitted. 1248 4. During the review period, the plan shall be approved or disapproved and the decision 1249 communicated in writing to the person responsible for the land disturbing activity or their 1250 designated agent. If the plan is not approved, the reasons for not approving the plan shall be 1251 provided in writing. Approval or denial shall be based on the plan's compliance with the 1252 requirements of this chapter and of the qualifying local program. 5. If a plan meeting all requirements of this chapter and of the qualifying local program is 1253 1254 submitted and no action is taken within the time specified above, the plan shall be deemed 1255 approved. C. Notwithstanding the requirements of subsection A. if allowed by the qualifying local 1256 1257 program, an initial stormwater management plan may be submitted for review and approval 1258 when it is accompanied by an erosion and sediment control plan, preliminary stormwater design 1259 for the current and future site work, fee form, and 50% of the fee required by 4VAC50-60-820. Such plans shall be limited to the initial clearing and grading of the site unless otherwise allowed 1260 1261 by the qualifying local program. Approval by the qualifying local program of an initial plan

September 4, 2008

- does not supersede the need for the submittal and approval of a complete stormwater
 management plan and the updating of the SWPPP prior to the commencement of activities
 beyond initial clearing and grading and other activities approved by the local program. The
 initial plan shall include information detailed in subsection B to the extent required by the
 qualifying local program and such other information as may be required by the local program.
 - D. Each approved plan may be modified in accordance with the following:
 - 1. Modifications to an approved stormwater management plan shall be allowed only after review and written approval by the qualifying local program. The qualifying local program shall have 60 calendar days to respond in writing either approving or disapproving such requests.
 - 2. Based on an inspection, the qualifying local program may require amendments to the approved stormwater management plan to address the noted deficiencies and notify the permittee of the required modifications.

4VAC50-60-112. Qualifying local program authorization of coverage under the VSMP General Permit for Discharges of Stormwater from Construction Activities.

- A. Coverage shall be authorized by the qualifying local program under the VSMP General Permit for Discharges of Stormwater from Construction Activities in accordance with the following:
- 1. The applicant must have an approved initial stormwater management plan or an approved stormwater management plan for the land disturbing activity.
- 2. The applicant must have submitted proposed right-of-entry agreements or easements from the owner for purposes of inspection and maintenance and proposed maintenance agreements, including inspection schedules, in accordance with 4VAC50-60-124.
- 3. The applicant must have an approved registration statement for the VSMP General Permit for Discharges of Stormwater from Construction Activities.
- 4. The applicant must have submitted the required fee form and total fee required by 4VAC50-60-820.
- 5. Applicants submitting registration statements deemed to be incomplete must be notified within 15 working days of receipt by the qualifying local program that the registration statement is not complete and be notified (i) of what material needs to be submitted to complete the registration statement, and (ii) that the land disturbing activity does not have coverage under the VSMP General Permit for Discharges of Stormwater from Construction Activities.
- B. Coverage or termination of coverage shall be authorized through a standardized database or other method provided by the department. Such database shall include, at a minimum, permit number, operator name, activity name, acres disturbed, date of permit coverage, and site address and location as well as date of termination.
- C. Coverage information pertaining to the VSMP General Permit for Discharges of Stormwater from Construction Activities shall be reported to the department in accordance with 4VAC50-60-126 by the qualifying local program.
- D. The applicant shall be notified of authorization of permit coverage by the qualifying local program.

4VAC50-60-114. Inspections.

 A. The qualifying local program or its designee shall inspect the land disturbing activity during construction for compliance with the VSMP General Permit for Discharges of Stormwater from Construction Activities.

September 4, 2008

1308	B. The person responsible for the development project or their designated agent shall
1309	submit to a qualifying local program a construction record drawing for permanent stormwater
1310	management facilities, appropriately sealed and signed by a professional in accordance with all
1311	minimum standards and requirements pertaining to the practice of that profession pursuant to
1312	Chapter 4 of Title 54.1 of the Code of Virginia and attendant regulations, certifying that the
1313	stormwater management facilities have been constructed in accordance with the approved plan.
1314	The qualifying local program shall have the construction record drawing and certification on file
1315	prior to the release of the portion of the performance bond or surety associated with the
1316	stormwater management facility.
1317	C. The owner(s) of stormwater management facilities shall be required to conduct
1318	inspections in accordance with an inspection schedule in a recorded maintenance agreement, and
1319	shall submit written inspection and maintenance reports to the qualifying local program upon
1320	request. Such reports, if consistent with a board approved inspection program established in

- inspections in accordance with an inspection schedule in a recorded maintenance agreement, and shall submit written inspection and maintenance reports to the qualifying local program upon request. Such reports, if consistent with a board approved inspection program established in Subsection D, may be utilized by the qualifying local program if the inspection is conducted by a person who is licensed as a professional engineer, architect, certified landscape architect or land surveyor pursuant to Article 1 (§54.1-400 et seq.) of Chapter 4 of Title 54.1 or who holds a certificate of competence from the board. The reports, if so utilized, must be kept on file with the qualifying local program
- D. A qualifying local program shall establish an inspection program that ensures that the stormwater management facilities are functioning as intended. Any inspection program shall be:
 - 1. Approved by the board prior to implementation;
 - 2. Established in writing;
- 3. Based on a system of priorities that takes into consideration the purpose and type of the facility, ownership and the existence of a recorded maintenance agreement and inspection schedule, the contributing drainage area, and downstream conditions;
- 4. Demonstrated to be an enforceable inspection program that meets the intent of the regulations and ensures that each stormwater management facility is inspected by the qualifying local program or its designee, not to include the owner except as provided in subsection C, at least every five years; and
 - 5. Documented by inspection records.
- <u>E. Inspection reports shall be generated and kept on file in accordance with 4VAC50-60-</u>126 for all stormwater management facilities inspected by the qualifying local program.

4VAC50-60-116. Qualifying local program enforcement.

- A. A qualifying local program may incorporate the following components:
- 1. Informal and formal administrative enforcement procedures including:
- a. Verbal warning and inspection reports;
- b. Notices of corrective action;
- 1346 c. Consent special orders and civil charges in accordance with §§10.1-603.2:1 subsection 1347 7 and 10.1-603.14 subsection D2;
 - d. Notices to comply in accordance with §10.1-603.11;
- e. Special orders in accordance with §10.1-603.2:1 subsection 7;
- f. Emergency special orders in accordance with §10.1-603.2:1 subsection 7; and
- g. Public notices and comment periods pursuant to 4VAC50-60-660.
- 2. Civil and criminal judicial enforcement procedures including:
- a. Schedule of civil penalties set out in subsection D:

September 4, 2008

1354	b. Criminal penalties in accordance with §10.1-603.14 subsections B and C; and
1355	c. Injunctions in accordance with §§10.1-603.12:4 and 10.1-603.14 subsection D1.
1356	B. A qualifying local program shall develop policies and procedures that outline the ste

 B. A qualifying local program shall develop policies and procedures that outline the steps to be taken regarding enforcement actions under the Stormwater Management Act and attendant regulations and the local ordinance.

C. A qualifying local program may utilize the department's Stormwater Management Enforcement Manual as guidance in establishing policies and procedures.

D. A court may utilize as guidance the following Schedule of Civil Penalties set by the board in accordance with §10.1-603.14 subsection A. The range contained within the schedule reflects the degree of harm caused by the violation, which is site-specific and may vary greatly from case to case, as may the economic benefit of noncompliance to the violator. Each day of violation of each requirement shall constitute a separate offense. The court has the discretion to impose a maximum penalty of \$32,500 per violation per day in accordance with §10.1-603.14 subsection A.

3				
1. Gravity-based Component	<u>Marginal</u>	<u>Moderate</u>	<u>Serious</u>	
Violations* and Frequency of Occurrence **	\$\frac{\\$\\$ x}{\text{occurrences}}	\$\frac{\\$\\$ x}{\text{occurrences}}	\$\$ x occurrences	SUBTOTAL

* Each stormwater BMP or E&	&S control that is e	ither not installed o	or improperly installe	d or maintained

^{*} Each stormwater BMP or E&S control that is either not installed or improperly installed or maintained is a separate violation.

E. Pursuant to § 10.1-603.2:1 subsection 2, authorization to administer a qualifying local program shall not remove from the board the authority to enforce the provisions of the Virginia Stormwater Management Act and attendant regulations.

F. All amounts recovered by a qualifying local program shall be paid into the treasury of the locality in which the violation occurred and are to be used for the purpose of minimizing, preventing, managing, or mitigating pollution of the waters of the locality and abating environmental pollution therein in such manner as the court may, by order, direct.

4VAC50-60-118. Hearings.

A qualifying local program shall ensure that any permit applicant or permittee shall have a right to a hearing pursuant to § 10.1-603.12:6 and shall ensure that all hearings held under this chapter shall be conducted in accordance with § 10.1-603.12:7 or as otherwise provided by law.

4VAC50-60-122. Qualifying local program: exceptions.

A. An exception to the provisions of Part II (4VAC50-60-40 et seq.) may be requested. A qualifying local program may grant exceptions through an administrative process. A request for an exception, including the reasons for making the request, shall be submitted, in writing, to the qualifying local program. An exception may be granted, provided that: (i) the exception is the minimum necessary to afford relief, (ii) reasonable and appropriate conditions shall be imposed as necessary upon any exception granted so that the intent of the Act and this chapter are preserved, (iii) granting the exception will not confer on the permittee any special privileges that are denied to other permittees who present similar circumstances, and (iv) exception requests are not based upon conditions or circumstances that are self-imposed or self-created.

^{**} The frequency of occurrence is per event unless otherwise noted.

September 4, 2008

1393	B. Economic hardship alone is not sufficient reason to grant an exception from	the
1394	requirements of this chapter.	

- C. Under no circumstance shall the qualifying local program grant an exception to the requirement that the land disturbing activity obtain a permit.
- D. A record of all exceptions granted shall be maintained by the qualifying local program and reported to the department in accordance with 4VAC50-60-126.

<u>4VAC50-60-124.</u> Qualifying local program: Stormwater Management Facility maintenance.

A. Responsibility for the operation and maintenance of stormwater management facilities in accordance with this chapter, unless assumed by a governmental agency, shall remain with the property owner or other legally established entity and shall pass to any successor. The government entity implementing the qualifying local program shall be a party to each maintenance agreement. Such maintenance agreement shall include an inspection schedule, and shall ensure that the designed flow and drainage patterns to a permanent facility are maintained. Such agreements may also contain provisions specifying that, where maintenance or repair of a stormwater management facility located on the owner's property is neglected, or the stormwater management facility becomes a public health or safety concern and the owner has failed to perform the necessary maintenance and repairs after receiving notice from the locality, the qualifying local program may perform the necessary maintenance and repairs and recover the costs from the owner. In the specific case of a public health or safety danger, the written notice may be waived by the locality.

- B. The qualifying local program shall be notified of any transfer or conveyance of ownership or responsibility for maintenance of a stormwater management facility.
- C. The qualifying local program shall require right-of-entry agreements or easements from the property owner for purposes of inspection and maintenance.

4VAC50-60-126. Qualifying local program: reporting and record keeping.

- A. On a fiscal year basis (July 1 to June 30), a qualifying local program shall report to the department by October 1st of each year in a format provided by the department. The information to be provided shall include the following:
- 1. Information on each permanent stormwater management facility completed during the fiscal year to include type of stormwater management facility, coordinates, acres treated, and the surface waters or karst features into which the stormwater management facility will discharge;
- 2. Number of VSMP General Permit for Discharges of Stormwater from Construction Activities projects inspected and the total number of inspections by acreage categories determined by the department during the fiscal year;
 - 3. Number and type of enforcement actions during the fiscal year; and
- 4. Number of exceptions applied for and the number granted or denied during the fiscal year.
- B. A qualifying local program shall make information set out in subsection A available to the department upon request.
 - C. A qualifying local program shall keep records in accordance with the following:
- 1. Permit files shall be kept for 3 years after permit termination. After 3 years, the permit file shall be delivered to the department by October 1 of each year.

1438	2. Stormwater maintenance facility inspection reports shall be kept for 5 years from the
1439	date of inspection.
1440	3. Stormwater maintenance agreements, design standards and specifications, post-
1441	construction surveys, and maintenance records shall be maintained in perpetuity.
1442	
1443	Part IIIB
1444	Department of Conservation and Recreation administered local
1445	programs
1446	
1447	4VAC50-60-128. Authority and Applicability.
1448	In the absence of a qualifying local program, the department, in accordance with an
1449	adoption and implementation schedule set by the board and upon board approval, shall
1450	administer the local stormwater management program in a locality in accordance with §10.1-
1451	603.3 subsection C. This part specifies the minimum technical criteria for a department -
1452	administered local stormwater management program in accordance with the Virginia Stormwater
1453	Management Act, §10.1-603.2 et seq., and the standards and criteria established in these
1454	regulations by the board pursuant to its authority under that article. Such criteria include but are
1455	not limited to administration, plan review, issuance of coverage under the Virginia Stormwater
1456	Management Program (VSMP) General Permit for Discharges of Stormwater from Construction
1457	Activities, issuance of individual permits, inspection, enforcement, and education and outreach
1458	components.
1459	
1460	4VAC50-60-132. Technical criteria.
1461	A. The department-administered local stormwater management programs shall require
1462	compliance with the provisions of Part II (4VAC50-60-40 et seq.) unless an exception is granted
1463	pursuant to 4VAC50-60-142 subsection D and shall comply with the requirements of 4VAC50-
1464	<u>60-460 subsection L.</u>
1465	B. When reviewing a federal project, the department shall apply the provisions of this
1466	<u>chapter.</u>
1467	C. Nothing in this chapter shall be construed as limiting the rights of other federal and
1468	state agencies to impose stricter technical criteria or other requirements as allowed by law.
1469	
1470	4VAC50-60-134. Administrative requirements.
1471	A. The department is the permit issuing authority, plan approving authority, and the
1472	enforcement authority.
1473	B. The department or its designee is the plan reviewing authority and the inspection
1474	authority.
1475	C. The department shall assess and collect fees.
1476	D. The department may require the submission of a reasonable performance bond or
1477	other financial surety in accordance with the criteria set forth in §10.1-603.8 prior to the issuance
1478	of coverage under the VSMP General Permit for Discharges of Stormwater from Construction
1479	Activities and in accordance with the following:
1480	1. The amount of the installation performance security shall be the total estimated
1481	construction cost of the stormwater management BMPs approved under the stormwater

1482

management plan, plus 25%;

September 4, 2008

1483	2. The performance security shall contain forfeiture provisions for failure, after proper
1484	notice, to complete work within the time specified, or to initiate or maintain appropriate actions
1485	which may be required in accordance with the approved stormwater management plan;

- 3. Upon failure by the applicant to take such action as required, the department may act and may collect from the applicant the difference should the amount of the reasonable cost of such action exceed the amount of the security held; and
- 4. Within sixty days of the completion of the requirements and conditions of the VSMP General Permit for Discharges of Stormwater from Construction Activities and the department's acceptance of the Notice of Termination, such bond, cash escrow, letter of credit or other legal arrangement shall be refunded to the applicant.

4VAC50-60-136. Stormwater management plan review.

- A. The department shall require stormwater management plans for review and be approved prior to commencement of land disturbing activities.
- B. The department shall approve or disapprove a stormwater management plan and required accompanying information according to the criteria set out for a qualifying local program in 4VAC50-60-108 subsection B.
 - C. The department shall not accept initial stormwater management plans.
- D. Each approved stormwater management plan may be modified in accordance with the criteria set out for a qualifying local program in 4VAC50-60-108 subsection D.

<u>4VAC50-60-138.</u> <u>Issuance of coverage under the VSMP General Permit for Discharges of Stormwater from Construction Activities.</u>

The department shall issue coverage under the VSMP General Permit for Discharges of Stormwater from Construction Activities in accordance with the following:

- 1. The applicant must have a department approved stormwater management plan for the land disturbing activity.
- 2. The applicant must have submitted a complete registration statement for the VSMP General Permit for Discharges of Stormwater from Construction Activities in accordance with Part VII (4VAC50-60-360 et seq.) and the requirements of the VSMP General Permit for Discharges of Stormwater from Construction Activities, which acknowledges that a SWPPP has been developed and will be implemented, and the registration statement must have been reviewed and approved prior to the commencement of land disturbance.
- 3. The applicant must have submitted the required fee form and fee for the registration statement seeking coverage under the VSMP General Permit for Discharges of Stormwater from Construction Activities.
- 4. Applicants submitting registration statements deemed to be incomplete must be notified within 15 working days of receipt by the department that the registration statement is not complete and be notified (i) of what material needs to be submitted to complete the registration statement, and (ii) that the land disturbing activity does not have coverage under the VSMP General Permit for Discharges of Stormwater from Construction Activities.
 - 5. The applicant shall be notified of authorization of permit coverage by the department.
- <u>56. Individual permits for qualifying land disturbing activities may be issued at the discretion of the board or its designee pursuant to 4VAC50-60-410 subsection B3.</u>

	4VAC50-60-142. Inspections, Enforcement, Hearings, Exceptions, and Stormwater
	Management Facility Maintenance.
	A. Inspections shall be conducted by the department in accordance with 4VAC50-60-
	114.
	B. Enforcement actions shall be conducted by the department in accordance with 4VAC50-60-116. The department's Stormwater Management Enforcement Manual shall serve
_	as guidance to be utilized in enforcement actions under the Stormwater Management Act and
_	attendant regulations. Any amounts assessed by a court as a result of a summons issued by the
	poard or the department shall be paid into the state treasury and deposited by the State Treasurer
	into the Virginia Stormwater Management Fund established pursuant to §10.1-603.4:1.
-	C. Hearings shall be conducted by the department in accordance with 4VAC50-60-118.
	D. Exceptions may be granted by the department in accordance with 4VAC50-60-122.
	E. Stormwater management facility maintenance shall be conducted in accordance with
2	4VAC50-60-124.
-	1771030 00 121.
4	4VAC50-60-154. Reporting and record keeping.
-	A. The department shall maintain a current database of permit coverage information for
į	all projects that includes permit number, operator name, activity name, acres disturbed, date of
_	permit coverage, and site address and location.
•	B. On a fiscal year basis (July 1 to June 30), a local program shall report to the
(department by October 1 st in accordance with 4VAC50-60-126 subsection A.
	C. On a fiscal year basis (July 1 to June 30), the department shall compile information
]	provided by local programs.
	D. Records shall be maintained by the department in accordance with 4VAC50-60-126
į	subsection C.
]	Part IIIC
	Department of Conservation and Recreation procedures for review
•	of qualifying local programs
	or quantying local programs
	4VAC50-60-156. Authority and Applicability.
	This part specifies the criteria that the department will utilize in reviewing a locality's
	administration of a qualifying local program pursuant to §10.1-603.12 following the board's
	approval of such program in accordance with the Virginia Stormwater Management Act and
	these regulations.
	these regulations.
	4VAC50-60-157. Stormwater Management Program Review.
	A. The department shall review each board-approved qualifying local program once
	every five years on a review schedule approved by the board. The department may review a
	qualifying local program on a more frequent basis if deemed necessary by the board and shall
	notify the local government if such review is scheduled.
	B. The review of a board-approved qualifying local program shall consist of the
	following:
	1. A personal interview between department staff and the qualifying local program
	administrator or his designee;

1573	2. A review of the local ordinance(s) and other applicable documents;
1574	3. A review of a subset of the plans approved by the qualifying local program and
1575	consistency of application including exceptions granted;
1576	4. An accounting of the receipt and of the expenditure of fees received;
1577	5. An inspection of regulated activities; and
1578	6. A review of enforcement actions and an accounting of amounts recovered through
1579	enforcement actions.
1580	C. To the extent practicable, the department will coordinate the reviews with other local
1581	government program reviews to avoid redundancy.
1582	D. The department shall provide its recommendations to the board within 90 days of the
1583	completion of a review. Such recommendations shall be provided to the locality in advance of
1584	the meeting.
1585	E. The board shall determine if the qualifying local program and ordinance are consistent
1586	with the Act and state stormwater management regulations and notify the qualifying local
1587	program of its findings.
1588	F. If the board determines that the deficiencies noted in the review will cause the
1589	qualifying local program to be out of compliance with the Stormwater Management Act and its
590	attendant regulations, the board shall notify the qualifying local program concerning the
591	deficiencies and provide a reasonable period of time for corrective action to be taken. If the
592	qualifying local program agrees to the corrective action recommended by the board, the
593	qualifying local program will be considered to be conditionally compliant with the Stormwater
594	Management Act and its attendant regulations. If the qualifying local program fails to take the
595	corrective action within the specified time, the board may take action pursuant to §10.1-603.12
596	of the Code of Virginia.
597	
98	Part IIID
99	Virginia Soil and Water Conservation Board authorization
00	procedures for qualifying local programs
501	ATTA CEO CO 150 A AL 14 LA 14
602	4VAC50-60-158. Authority and Applicability.
603	Section 10.1-603.4 subsection 1 requires that the board establish standards and
604	procedures for authorizing a locality to administer a stormwater management program. In
605	accordance with that requirement, and with the further authority conferred upon the board by the
606	Virginia Stormwater Management Act, §10.1-603.2 et seq., this part specifies the procedures the
607	board will utilize in authorizing a locality to administer a qualifying local program.
608	
609	4VAC50-60-159. Authorization Procedures for Qualifying Local Programs.
610	A. A locality required to adopt a program in accordance with §10.1-603.3 subsection A
611	or those electing to seek authorization to administer a qualifying local program must submit to
612	the board an application package which, at a minimum, contains the following:
613	1. The local program ordinance(s);
614	2. A funding and staffing plan based on the projected permitting fees;
615	3. The policies and procedures, including but not limited to, agreements with Soil and
1616	Water Conservation Districts, adjacent localities, or other entities, for the administration, plan

review, permit issuance, inspection and enforcement components of the program; and

September 4, 2008

- B. A locality required to adopt a qualifying local program or a locality seeking authorization to administer a qualifying local program pursuant to this chapter must be administering an erosion and sediment control program that has been found by the board to be consistent or conditionally consistent with the Erosion and Sediment Control Law, § 10.1-560 et seq. The department at the direction of the board shall administer a board approved stormwater management program for a locality that is not operating a consistent or conditionally consistent erosion and sediment control program.
- C. Upon receipt of an application package, the board or its designee shall have 20 calendar days to determine the completeness of the application package. If an application package is deemed to be incomplete based on the criteria set out in subsection A of this section, the board or its designee must identify in writing the reasons the application package is deemed deficient.
- D. Upon receipt of a complete application package, the board or its designee shall have 90 calendar days for the review of the application package. During the 90-day review period, the board or its designee shall either approve or disapprove the application, or notify the locality of a time extension for the review, and communicate its decision to the locality in writing. If the application is not approved, the reasons for not approving the application shall be provided to the locality in writing. Approval or denial shall be based on the application's compliance with the Virginia Stormwater Management Act and these regulations.
- E. A locality required to adopt a qualifying local program in accordance with §10.1-603.3 subsection A shall submit a complete application package for the board's review pursuant to a schedule set by the board in accordance with § 10.1-603.3 and shall adopt a qualifying local program consistent with the Act and this chapter within the timeframe established pursuant to § 10.1-603.3.
- F. A locality not required to adopt a qualifying local program in accordance with §10.1-603.3 subsection A but electing to adopt a qualifying local program shall notify the board in accordance with the following:
- 1. A locality electing to adopt a qualifying local program may notify the board of its intention within six months of the effective date of these regulations. Such locality shall submit a complete application package for the board's review pursuant to a schedule set by the board and shall adopt a qualifying local program within the timeframe established by the board.
- 2. A locality electing to adopt a qualifying local program that does not notify the board within the initial six-month period of its intention may thereafter notify the board at any regular meeting of the board. Such notification shall include a proposed schedule for adoption of a qualifying local program within a timeframe agreed upon by the board.
- G. The department shall administer the responsibilities of the Act and this chapter in any locality in which a qualifying local program has not been adopted. The department shall develop a schedule, to be approved by the board, for adoption and implementation of the requirements of this chapter in such localities. Such schedule may include phases of implementation and shall be based upon considerations including the typical number of permitted projects located within a locality, total number of acres disturbed by such permitted projects, and such other considerations as may be deemed necessary by the board.
